---

Aspiring for a challenging job in a multinational company that helps to master the field of total quality management of the projects and contribute to the growth & development of the organisation.

## Experience

- **2024 - August (Continue) (Singhsoft Technology Pvt. Ltd. Jaipur)**

#### **Project Name:- Finbuzz**

Project Details:- Finbuzz was developing for SIP base. In this project user can start your self money plan using this app.

- **2016 - April To 2024 - July (The Ninehertz India Pvt. Ltd. Jaipur)**

#### **Project Name:- M Bosses**

Project Details:- M bosses app was developed for streaming and meeting new people around the world. You can get together with other streamers and showcase your talents (singing, acting or just good conversation). Make new friends and get virtual gifts for showcasing your talents.

Short Description:- Online streaming and Social site. Using Agora Framework.

#### **Project Name:- KO Sport**

Project Details:- This app is designed to connect athletes and fitness enthusiasts, allows them to live-stream a match and enables viewers to place bets on the match. The creator can view all current viewers and recent comments on the live stream.

Short Description:- Live streaming and Place a bet on the match. Using Agora Framework.

#### **Project Name:- Dwaba**

Project Details:- We get the users monthly bills. They set up their bank account to withdraw a daily, weekly, or bi-weekly amount to pay monthly bills on time. For example my roommates never paid me the \$500/month in rent. After asking for \$125/week every roommate paid on time from then on. Even better, we offer down to the day so a \$500/month payment would cost \$16.13. We would round it to \$17 and funnel remainders into savings accounts.

Short Description:- In This Use In App Purchase and Stripe Payment. And Use Plaid Account For Fetch Account Details.

#### **Project Name:- Propersition**

**Project Details:-** The goal of this application is to provide a platform where users can make custom wagers with their friends for money. Users can define the “competition”, or wager, and MUST select a Mediator must video capture and upload the contest, then they will declare the outcome of the wager since there is no other way to determine the winner.

### **Project Name:- Vital Link**

**Project Details:-** The goal of this application is to act as an emergency response in case medical emergencies occur to a user like sudden cardiac arrest. Thus through the use of bluetooth enabled Heart monitoring smart watches whereby if the value goes below the threshold value it will send automatic heart alert status to the emergency contacts as added by user if s/he is a free user type in the application. If the user is a subscribed user then it will enable the 911 call option so that they can call an emergency service provider.

**Short Description:-** In This Project Get Data From Apple Watch as Heart Bit, Blood pressure, Steps And Etc, And Make a Graph.

### **Project Name:- Talent Vision**

**Project Details:-** The goal of the app is to provide a platform to the Managers (users) from which they can search for contract workers and assign them projects.

1. **Manager:** the company owner will apply to register as a manager in the application. The administrator will approve the manager from the web admin panel. Once approved, the manager will access the profile. They will be able to send invites to the contract workers to work with them.
2. **Contract Worker (CW):** the user who will be able to list their service, price, and service location.

**Short Description:-** In this Project Use Stripe Payment, For working on a Project, Payment on Daily, per hour and monthly bases.

### **Project Name:- PubView**

**Project Details:-** The goal of this mobile application is to display the live feed of bars, pubs, and restaurants to the user that they are looking to visit. This way users can determine what kind of experience the establishment will have at the moment. The app also allows the users to exchange messages with each other.

**Short Description:-** they are the registered user of the application and will be able to view the live feed of the bar/ pub. They are the business owners who are going to list themselves over the app and manage the live streaming.

### **Project Name- Drode Rider / Drode Driver**

**Project details-**The strong effective reason behind this system is to connect professional drivers to riders who need themselves and their car to be driven at home safely, picked up and dropped off from events, have appointments to go to, and many more. The platform will allow professionals to take the wheel and let riders enjoy the luxury of a personal chauffeur in the comfort of their own car.

**Short Description:-** In this app use Google Place Api & Distance Api for moving car one place to another. Rider to Driver Etc.

### **Project Name- Cello**

**Project Details-** The objective is to develop a mobile application to allow users to create posts for the places they visit and share them on the app. Users will be facilitated to register themselves, set up their be able to create various collections under which any user can post their story/feed. Users will be able to view like, comment, and collaborate on their posts, and check up on other users' activities too.

**Short Description:-** In this app user upload story and get more prices, as type of tickets.

### **Project Name- Yalla Chance**

**Project Details-** The strong effective reason behind the commencement of this system is to develop an app where users will be able to participate in a draw by purchasing products. There will be five categories and relevant subcategories where products will be available to purchase and get a chance to take part in a lucky draw to with AED amounts. Each such campaign will last for either till the date of the draw or will be ended before if all the units will be sold. The winner will be select by the admin offline and announced on the platform. The user will be able to choose if he wants to pick up the purchased product or want to get it delivered at some extra charge.

**Short Description:-** In this app user add product in cart after using stripe payment get product on mention address.
